

Doug Wood Trucking

17312 E. 51st Street Ct. So.

Independence, Mo. 64055

31 May 2008

My name is Doug Wood and I am a lease operator with MNT Inc. located in Topeka Ks. I own and operate a 2000 Kenworth W-900 conventional aerocab tractor, powered by a 500 hp Detroit Series 60 motor, along with a 13 speed Eaton transmission and equipped with 3.55 rear ends.

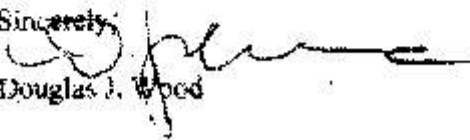

I started using Fuel Magic in August of 2007 and have used it consistently since then. I have experienced several improvements. Additional power, additional fuel mileage, and increased fuel filter life. Prior to my starting to use Fuel Magic I averaged between 5.5 and 6 miles per gallon and was experiencing fuel filter failure around 5000 miles. Since my starting to use Fuel Magic my fuel mileage average has risen to 6.5 to 7.0 miles per gallon.

I operate primarily in the Midwest and pull 48 and 53 foot refrigerated trailers. My gross weight averages 60,000 pounds or more. By increasing my fuel per mile average it has produced a savings of approximately \$10,432 per year. This savings can be directly attributed to my use of Fuel Magic. I use Fuel Magic faithfully every time I fill up.

The use of Fuel Magic has also increased my fuel filter life. Prior to using Fuel Magic I was averaging fuel filter failure approximately every 5,000 miles. Since I started using Fuel Magic I change fuel filters around 15,000 miles. That represents a considerable savings. I use a Davco water separator style filter system.

I highly recommend your product. One of the essential keys is using Fuel Magic on a consistent and regular basis.

Sincerely,

Douglas J. Wood
